Investment Objective

The investment objective of the Baird MidCap Fund (the “Fund”) is to provide long-term growth of capital.

Fees and Expenses of the Fund

The table below describes the fees and expenses that you may pay if you buy and hold shares of the Fund.

Shareholder Fees

(fees paid directly from your investment)

None

Annual Fund Operating Expenses

(expenses that you pay each year as a percentage of the value of your investment)

	<i>Investor Class Shares</i>	<i>Institutional Class Shares</i>
Management Fees	0.75%	0.75%
Distribution and Service (12b-1) Fees	0.25%	None
Other Expenses ⁽¹⁾	0.09%	0.09%
Total Annual Fund Operating Expenses	1.09%	0.84%

(1) Please note that the Total Annual Fund Operating Expenses in the table above do not correlate to the Ratio of Expenses to Average Net Assets (before waivers) found within the “Financial Highlights” section of this prospectus, which reflects the operating expenses of the Fund and does not include fees and expenses incurred indirectly by the Fund as a result of investments in other investment companies.

Example

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds.

The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	1 Year	3 Years	5 Years	10 Years
Investor Class Shares	\$111	\$347	\$601	\$1,329
Institutional Class Shares	\$ 86	\$268	\$466	\$1,037

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in total annual fund operating expenses or in the example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 44.5% of the average value of its portfolio.

Principal Investment Strategies

The Fund normally invests at least 80% of its net assets, plus any borrowings for investment purposes, in the equity securities of U.S. and foreign mid-capitalization companies, principally common stocks, preferred stocks, securities convertible into common stocks and American Depositary Receipts (“ADRs”) that are traded on major U.S. exchanges. Although the Fund principally invests in U.S. companies, the Fund may invest up to 15% of its total assets in equity securities (consisting of common stocks, ordinary shares and ADRs) of foreign companies. The Fund defines mid-capitalization companies as those companies with a market capitalization within the range of companies in the Russell Midcap[®] Growth Index at the time of investment.

When analyzing equity securities to be purchased by the Fund, Robert W. Baird & Co. Incorporated (the “Advisor”) emphasizes a company’s growth prospects. The Fund’s investments are selected using a variety of both quantitative techniques and fundamental research in seeking to maximize the Fund’s expected return while controlling risk.

The Fund seeks a portfolio comprised of companies which reflect “PRIME” growth factors. These factors are analyzed as part of the Advisor’s investment process and are represented in the following ways:

- **Durable Profitability.** Companies with attractive margins and favorable margin trends can drive superior earnings growth.
- **Sustainable Revenue Growth.** Solid barriers to entry, favorable pricing and demonstrated product/service track record can aid top-line prospects.
- **Favorable Industry dynamics.**
- **Management strength and integrity** is a critical element of a high quality company. Growth, profitability and shareholder returns provide insight into management effectiveness. The Advisor seeks companies with management that position their company’s balance sheet to be a source of strength.
- **Understanding market Expectations** of a company is important in assessing risk/return opportunities.

The Advisor believes an analysis of these PRIME factors yields insights to the competitive strength of a business model.

The Advisor applies the following strategies when purchasing securities for the Fund’s portfolio:

- Intentionally avoiding short-term trading strategies and rapid shifts in industry positions.
- Setting sector limits at the greater of 30% of the Fund’s total assets or double the weighting of the Russell Midcap[®] Growth Index in any one sector, as defined by such index.
- Typically holding the securities of fewer than 60 companies with exposure to at least 20 industries.
- Seeking securities whose growth prospects, in the Advisor’s opinion, are not reflected in their current stock prices.
- Limiting the size of any one new position. No security will represent more than 5% of the Fund’s total assets at the time of purchase.
- Leveraging key tools, such as the Advisor’s proprietary tier-board, which provides a visual representation of portfolio positions and enables discussion on relative weights of underlying positions.

The Advisor may sell a security due to achievement of valuation targets, significant change in the initial investment premise or fundamental deterioration.

Principal Risks

Please be aware that you may lose money by investing in the Fund. The following is a summary description of certain risks of investing in the Fund.

Stock Market Risks

Stock prices vary and may fall, thus reducing the value of the Fund's investments. Certain stocks selected for the Fund's portfolio may decline in value more than the overall stock market. The U.S. and international markets have experienced extreme price volatility, reduced liquidity and valuation difficulties in recent years. Continuing market problems may have adverse effects on the Fund.

Growth-Style Investing Risks

Because the Fund focuses on growth-style stocks, its performance may at times be better or worse than the performance of funds that focus on other types of stocks or that have a broader investment style. Growth stocks are often characterized by high price-to-earnings ratios, which may be more volatile than stocks with lower price-to-earnings ratios.

Management Risks

The Advisor's judgments about the attractiveness, value and potential appreciation of particular companies' stocks may prove to be incorrect. Such errors could result in a negative return and a loss to you.

Equity Securities Risks

Equity securities may experience sudden, unpredictable drops in value or long periods of decline in value. This change may occur because of factors that affect securities markets generally or factors affecting specific industries, sectors or companies in which the Fund invests.

Common Stock Risks

Common stocks are susceptible to general stock market fluctuations and to volatile increases and decreases in value as market confidence in and perceptions of their issuers change. Holders of common stocks are generally subject to greater risk than holders of preferred stocks and debt obligations of the same issuer because common stockholders generally have inferior rights to receive payments from issuers in comparison with the rights of preferred stockholders, bondholders and other creditors.

Mid-Capitalization Risks

Mid-capitalization stocks are often more volatile and less liquid than investments in larger companies. The frequency and volume of trading in securities of mid-size companies may be substantially less than is typical of larger companies. Therefore, the securities of mid-size companies may be subject to greater and more abrupt price fluctuations. In addition, mid-size companies may lack the management experience, financial resources and product diversification of larger companies, making them more susceptible to market pressures and business failure.

Foreign Securities Risks

Securities of foreign issuers and ADRs are subject to certain inherent risks, such as political or economic instability of the country of issue and government policies, tax rates, prevailing interest rates and credit conditions that may differ from those affecting domestic corporations. Securities of foreign issuers and ADRs may also be subject to currency fluctuations and controls and greater fluctuation in price than the securities of domestic corporations. Foreign companies generally are not subject to uniform auditing and financial reporting standards comparable to those applicable to domestic companies.

In June 2016, the United Kingdom (UK) voted to leave the European Union (EU) following a referendum referred to as "Brexit." There is significant market uncertainty regarding Brexit's ramifications, and the range of possible political, regulatory, economic, and market outcomes are difficult to predict. Other geopolitical events may also cause market disruptions. It is possible that geopolitical events could have an adverse effect on the value of the Fund's investments.

Recent Market Events

U.S. and international markets have recently experienced significant volatility due, in part, to uncertainties regarding how quickly the Federal Reserve will raise the Federal Funds rate, inflation and wage growth, the effects of the recently passed Tax Cuts and Jobs Act tax reform legislation, new tariffs imposed by the U.S. and other countries, other legislative, economic and regulatory changes proposed by the President of the United States, and how the financial markets will react to the foregoing and other developments. Such uncertainties may have adverse effects on the Fund.

Performance

The performance information provides some indication of the risks of investing in the Fund by showing changes in the Fund's performance from year to year and by showing how the Fund's average annual returns for one, five and ten years and since inception compare with those of a broad measure of market performance. Past performance, before and after taxes, is not necessarily an indication of how the Fund will perform in the future. Updated performance information is available on the Fund's website at www.bairdfunds.com or by calling the Fund toll-free at 1-866-442-2473.

Tax Information

The Fund's distribution may be subject to federal income tax and may be taxed as ordinary income or long-term capital gains unless you are investing through a tax-deferred arrangement, such as a 401(k) plan or an individual retirement account. You may be taxed later upon the withdrawal of such funds.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase Fund shares through a broker-dealer or other financial intermediary (such as a bank), the Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.
