

Chautauqua International Growth Equity

Strategy Profile

As of December 31, 2017

chautauquacapital.com | 303-541-1545

INVESTMENT PHILOSOPHY

The Chautauqua Capital's structure and investment process are designed to generate superior risk-adjusted returns through stock selection skill. This approach emphasizes great, wealth-creating businesses that benefit from long-term trends, possess the sustainable competitive advantages to exploit those trends and can be purchased at reasonable valuations.

To capture the full benefit of stock selection skill, portfolios should be invested for the long-term, on a conviction-weighted basis, in a concentrated set of best idea investments.

Risks are managed through care in implementation – with an emphasis on quality, thoughtful diversification, awareness of relevant exogenous factors and the application of a forward-looking valuation discipline.

We believe there is simply no better way to achieve long-term capital appreciation.

ABOUT THE FIRM

The Chautauqua Capital Management's investment results date back to the beginning of 2006, when the original portfolios were funded. The investment approach is the global application of a domestic equity approach that has been applied since 1987. Chautauqua Capital Management was formed at the beginning of 2009.

In 2016, Chautauqua became part of Baird, an employee-owned global financial services firm with a demonstrated commitment to asset management. Baird is nationally recognized as a great place to work and fosters a culture based on one powerful principal: keeping clients first.

Baird was established in 1919 and in addition to asset management provides private wealth management, capital markets and private equity services to clients around the world.

PERFORMANCE INFORMATION*

	Cumulative Return (%)		Average Annual Total Returns (%)					Since Inception **
	QTD	YTD	1 Yr	3 Yr	5 Yr	10 Yr		
CCIG Gross	6.13	37.04	37.04	12.89	10.50	4.92	8.70

Excess Return (Net)	1.01	8.85	8.85	4.12	2.81	2.33	3.11	

*Information presented should be considered supplemental information to the full GIPS disclosure presentation on page 4.

**Since Inception, 01/01/06. Performance data quoted represents past performance. Past performance does not guarantee future results. Investment return and principal value of an investment in the fund will fluctuate so that an investor's shares when redeemed may be worth more or less than their original cost. The composite's current performance may be lower or higher than the performance data quoted. Performance figures assume reinvestment of all dividends and capital gains. For performance current to the most recent month-end, please visit bairdfunds.com.

STYLE International Equity

INVESTMENT OBJECTIVE

The strategy seeks to provide 300 basis points of annualized Alpha Share (excess returns, net of fees) for clients compared to the MSCI ACWI ex-US Index® over a normalized investment cycle.

Source: iShares MSCI ACWI ex-U.S. Index Fund. Portfolio characteristics, holdings, sector and country weightings are subject to change with market conditions. Data is based upon a representative account. It should not be assumed that an investment in the regions and sectors listed was, or will be, profitable. Information presented should be considered supplemental information to the full GIPS disclosure presentation on page II of the Appendix.

Forward price to earning is a measure of the price-to-earnings ratio using forecasted earnings for the P/E calculation. **Return on equity** is the amount of net income returned as a percentage of shareholders equity.

Portfolio characteristics, holdings, sector and country weightings are subject to change with market conditions.

Chautauqua International Growth Composite – Net of fees is calculated by subtracting management fees from the composite's gross performance (management fees are approximately 70 basis points on average)

The MSCI EAFE Index[®] is a free float-adjusted market capitalization weighted index that is designed to measure the equity market performance of developed markets, excluding the United States and Canada. The MSCI EAFE Index[®] consists of 21 developed market country indices.

The MSCI ACWI ex-U.S. Index[®] is a free float-adjusted market capitalization weighted index that is designed to measure the equity market performance of developed and emerging markets excluding the United States.

[1] N/A information is not statistically meaningful due to an insufficient number of portfolios for the entire period.

[2] Performance presented prior to December 31, 2008 occurred in a seed portfolio at a prior firm and thus are not considered CCM firm assets. Please reference disclosure #1 below for further details.

Baird Equity Asset Management claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS® standards. CCM has been independently verified for the periods January 1, 2009 – December 31, 2015.

Verification assesses whether 1) the firm has complied with all the composite construction requirements of the GIPS® standards on a firm-wide basis and 2) the firm's policies and procedures are designed to calculate and present performance in compliance with the GIPS® standards. The CCM International Growth Equities Composite has been examined for the periods January 1, 2006 – December 31, 2008 by TCW's auditor and for the period January 1, 2009 through December 31, 2015 by Ashland Partners. The verification and performance examination reports for Ashland Partners are available upon request.

- On January 15, 2016, Baird Equity Asset Management acquired Chautauqua Capital Management, LLC. Performance presented prior to this date conforms to the GIPS guidelines regarding the portability of investment results.
- The performance of the Chautauqua International Growth Equities Composite for the period January 1, 2006 (inception) to December 31, 2008 reflects performance of a seed portfolio that was managed by Brian Beitner while at the TCW group. Thereafter, Mr. Beitner transferred the assets of the seed portfolio to a separate account and established CCM. During the entire time Mr. Beitner has been the sole decision maker for the account. From January 2006 to November 2006, the International Growth Equities Composite was a carve out of a TCW Global fund where cash was allocated proportionally based upon the net asset value of each strategy at the time.
- The composite was created in the first quarter of 2006.
- CCM was established to provide investment advisory services in the marketable securities area.
- The composite includes accounts managed in accordance with the International Growth Equity Strategy, except for accounts subject to material client restrictions, which are, therefore, deemed non-discretionary.
- Results are time-weighted and geometrically linked to yield quarterly returns, and include all items of income and reinvestment of all income including realized and unrealized gains and losses.
- A complete list and description of firm composites is available upon request.
- The dispersion of annual returns is measured by the standard deviation across asset-weighted portfolio returns represented within the composite for the full year. Dispersion is not shown for years with five or fewer accounts.
- The currency used to express performance is the U.S. dollar.
- Gross results do not reflect the deduction of management fees and other custodial fees. Including these costs would reduce the shown returns. Net of fee performance is calculated using actual management fees. Actual investment advisory fees may vary across accounts and result in different net returns. Net results do not include the deduction of custodial fees or other administrative expenses, which will also reduce the returns.
- Baird Equity Asset Management makes no representation that future investment performance will conform to past performance and it should never be assumed that past performance foretells future performance.
- Policies for valuing portfolios, calculating performance and preparing compliant presentations are available upon request.
- The minimum asset level for accounts included in the composite is \$500,000, and was established in the first quarter of 2011.
- The composite is comprised of accounts whose objective is to outperform the benchmark over the long term by investing in approximately 25 to 35 securities in leading companies that possess sustainable competitive advantages and are positioned to benefit from long-lived thematic growth opportunities. The strategy will hold positions in several, but not necessarily all, economic sectors. Individual issuers will be headquartered in various regions around the world, primarily excluding the United States. The weightings are not expected to equate to these regions in terms of the countries portion of the Gross World Product. While CCM's objective is to outperform the stated benchmark, it does not imply that this strategy shall share, or attempt to share, the same or similar characteristics of the benchmark or attempt to track the benchmark. A full composite definition is available upon request.
- The benchmark is the MSCI EAFE Index® - GD (gross of dividend withholding taxes). The MSCI EAFE Index® is a free float-adjusted, capitalization-weighted index of common stocks which trade in 21 markets excluding the United States and Canada. All analysis is based on the iShares MSCI EAFE Index®.
- This composite contained 100% non-fee-paying accounts since its inception through May 31, 2011. The composite assets under management were comprised of non-fee paying assets as follows: December 31, 2011, 18.69%, December 31, 2012, 5.64%, December 31, 2013, 1.45%, December 31, 2014, 1.17%, December 31, 2015, 1.22%, December 31, 2016, 1.96% and December 31, 2017, 0.90%.
- The fee schedule is as follows:
Separate Accounts: 0.80% on the first \$100 million; 0.50% thereafter.
Commingled Fund Accounts: 1.00% on the first \$25 million; 0.80% on the next \$75 million; 0.60% thereafter.
- Withholding tax is deducted from dividends for the accounts contained in the composite, resulting in a net dividend return.
- Baird Equity Asset Management is an independent investment advisor registered under the Investment Advisors Act of 1940. Baird Equity Asset Management was established to provide investment advisory services in the marketable securities area through the management of global and international (ex-U.S.) equity portfolios.
