

Baird's COMP Module

Save time and money with this Baird Forecast Model add-on

BAIRD

Baird's Budget Forecast Model can help create a variety of what-if scenarios using your district's current financial data. For additional forecasting and analysis, **Baird's COMP Module add-on** dramatically reduces the time you spend entering data and projecting salary and benefit costs. In addition, the COMP Module helps you:

- Budget salary and fringe benefits with person-by-person accuracy
- Reduce – or eliminate – financial software data entry
- Generate graphs and summaries for board and staff meeting presentations
- Test and evaluate different budget scenarios with only a few keystrokes

Just like the Baird Budget Forecast Model, the COMP Module add-on is completely customizable to your district. As a one-time purchase, you own the module – annual updates are minor and can be done in-house. When you're done, COMP Module salary and benefit budget figures easily import into common financing portals like Alio and Skyward.

To learn how this valuable tool can save your district time and money, contact Baird today.
