INVESTMENT OBJECTIVE
The investment objective of the Fund is to seek a high level of current income that is exempt from federal income tax and is consistent with preservation of capital.

INVESTMENT PHILOSOPHY
The Fund utilizes a national strategy monitoring valuations across all municipal sectors including state and local general obligations, essential service revenue bonds, transportation and healthcare sectors, sales tax issues and other municipal obligations and attempts to avoid bonds subject to the AMT. It targets an average maturity in the intermediate range, investing in the 1-15 year segment of the yield curve. The team utilizes yield curve positioning in the investment management process to capture pricing inefficiencies and optimize yield and “roll” while striving for tax efficiency.

INVESTMENT STRATEGY
The Fund invests in a broadly diversified portfolio of federally tax-exempt municipal obligations issued by governmental authorities throughout the U.S. and its territories. The Fund may invest in all types of municipal obligations, including pre-refunded bonds, general obligation bonds, revenue bonds, and municipal lease participations.

The Fund normally invests at least 80% of its net assets in municipal bonds and debentures, the income from which is exempt from federal income tax (including the federal alternative minimum tax). The Fund invests principally in investment grade municipal obligations, rated at the time of purchase by at least one major rating agency, but may invest up to 10% of its net assets in non-investment grade municipal obligations. The Fund may also invest in unrated municipal obligations that are determined by Baird Advisors to be comparable in quality to the rated obligations.

While obligations of any maturity may be purchased, under normal circumstances, the Fund's dollar-weighted average effective maturity is generally expected to be between three and ten years.
The Morningstar Rating™ for funds is calculated for managed products with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The Morningstar Rating does not include any adjustment for sales loads. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent 3-year period actually has the greatest impact because it is included in all three rating periods.

The Baird Core Intermediate Municipal Bond Fund (Institutional Class) received a 4-star Overall Morningstar Rating out of 240 funds in the Muni National Intermediate Bond category as of 9/30/2020. The fund was rated 4-stars out of 240 funds, and 4 stars out of 218 funds for the 3- and 5-year periods, respectively.

Municipal securities may or may not be appropriate for all investors, especially for those in lower tax brackets.

Because the Fund may invest more than 25% of its total assets in municipal obligations issued by entities located in the same state or the interest on which is paid solely from revenues of similar projects, changes in economic, business or political conditions relating to a particular state or types of projects may have a disproportionate impact on the Fund.

All investments carry risk, including loss of principal. In a rising interest rate environment, the value of fixed-income securities generally decline and conversely, in a falling interest rate environment, the value of fixed income securities generally increase.

Indices are unmanaged and direct investment is not possible.

The SEC 30-Day Yield reflects the rate at which the fund is earning income on its current portfolio of holdings after expenses.

The quality profile is calculated on a market value-weighted basis. Per the Baird Funds prospectus, each security in the Fund is assigned the highest credit quality rating provided by a nationally recognized statistical rating organization (e.g. S&P, Moody’s, Fitch). For pre-refunded securities, the reported credit quality reflects the highest reported rating from S&P, Moody’s or Fitch for the underlying collateral. Per the Bloomberg Barclays index controlling rating methodology, each security in the index is assigned a rating using S&P, Moody’s, and Fitch (middle of three ratings, lower of two ratings, or singular rating if rated by one rating agency). Ratings are measured on a scale that generally ranges from AAA (highest) to D (lowest).

Baird Funds are offered through Robert W. Baird & Co., a registered broker/dealer, member NYSE and SIPC. Robert W. Baird & Co. also serves as investment advisor for the Fund and receives compensation for these services as disclosed in the current prospectus.
