INVESTMENT OBJECTIVE

The investment objective of the Fund is to seek current income consistent with preservation of capital.

INVESTMENT PHILOSOPHY

Risk control is the foundation of the Baird Advisors investment discipline. Since interest rates are extremely difficult to consistently forecast over time, Baird Advisors employs a duration-neutral, risk-controlled approach. The duration of the Fund is set substantially equal to the duration of the Bloomberg Barclays U.S. Short-Term Government/Corporate Bond Index, thus helping to ensure a high degree of predictability in tracking benchmark returns.

Incremental value is added through security selection, yield curve positioning, sector allocation and competitive execution of trades.

INVESTMENT STRATEGY

The Fund normally invests at least 80% of its net assets in the following types of U.S. dollar-denominated debt obligations:

- U.S. government and other public-sector entities
- Asset-backed and mortgage-backed obligations of U.S. and foreign issuers
- Corporate debt of U.S. and foreign issuers
- Money market instruments

The Fund invests primarily in investment grade debt obligations, but may invest up to 10% of its net assets in non-investment grade obligations. Non-investment grade obligations, at the time of purchase, are generally rated at least B or higher by at least one major rating agency or, if unrated, determined by Baird Advisors to be comparable in quality to the rated obligations.

Baird Advisors attempts to keep the duration of the Fund's portfolio equal to the duration of the Fund's benchmark. The dollar-weighted average portfolio duration of the Fund will normally be more than three months but less than one year during normal market conditions. The Fund may invest in debt obligations of all maturities. The Advisor attempts to diversify the Fund's portfolio by holding securities of many different issuers and choosing issuers in a variety of sectors.

*The Advisor has contractually agreed to waive management fees in an amount equal to an annual rate of 0.15% of the average daily net assets for the Fund until April 30, 2019. The agreement may only be terminated prior to the end of this term by or with the consent of the Baird Funds Board of Directors.

¹The Baird Ultra Short Bond Fund Institutional Class received 3 stars rated against 144 Ultrashort Bond Funds, as of 9/30/2018, based on risk-adjusted total return. Ratings are determined monthly and subject to change. The Overall Morningstar Rating for a mutual fund is derived from a weighted average of the performance figures associated with its three-, five and 10-year (if applicable) Morningstar Rating metrics. For each mutual fund with at least a three-year history, Morningstar calculates a Morningstar Rating based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a fund's adjusted monthly performance placing more emphasis on downward variations and rewarding consistent performance. The top 10% of funds in each category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars and the bottom 10% receive 1 star. The Baird Ultra Short Bond Fund (Institutional Class) was rated 3 stars out of 144 funds in the Ultrashort Bond category for the 3-year period.

Investment results assume all distributions are reinvested and reflect applicable fees and expenses.

The Fund may invest in mortgage- and asset-backed securities which may be subject to prepayment risk and thus may be more sensitive to interest rate changes than other types of debt securities. The Fund may also invest in U.S. dollar denominated securities issued by foreign issuers which involve additional risks including political and economic instability, differences in financial reporting standards and less regulated securities markets. While the U.S. government has historically provided financial support to various U.S. government-sponsored agencies, no assurance can be given that it will do so in the future if it is not obligated by law. All investments carry risk, including loss of principal. In a rising interest rate environment, the value of fixed-income securities generally decline and conversely, in a falling interest rate environment, the value of fixed income securities generally increase. Indices are unmanaged and direct investment is not possible.

²The SEC 30-Day Yield reflects the rate at which the fund is earning income on its current portfolio of holdings after expenses.

³The SEC 30-Day Unsubsidized Yield reflects the rate at which the fund is earning income on its current portfolio net of any expense waivers or reimbursements.

⁴The quality profile is calculated on a market value-weighted basis using the highest credit quality rating given by S&P, Moody's or Fitch for each security in the fund. Ratings are measured on a scale that generally ranges from AAA (highest) to D (lowest).

Indices are unmanaged and direct investment is not possible.

Baird Funds are offered through Robert W. Baird & Co., a registered broker/dealer, member NYSE and SIPC. Robert W. Baird & Co. also serves as investment advisor for the Fund and receives compensation for these services as disclosed in the current prospectus.
