BMDIX – Institutional Class Shares

Summary Prospectus
May 1, 2020

Before you invest, you may want to review the Baird MidCap Fund’s (the “Fund”) prospectus, which contains more information about the Fund and its risks. You can find the Fund’s prospectus and other information about the Fund, including the Fund’s statement of additional information and shareholder reports, online at http://www.bairdassetmanagement.com/baird-funds/funds-and-performance#Literature. You may also obtain this information at no cost by calling 1-866-442-2473 or by sending an e-mail request to prospectus@bairdfunds.com. The Fund’s prospectus and statement of additional information, both dated May 1, 2020, are incorporated by reference into this summary prospectus.

Beginning on January 1, 2021, as permitted by regulations adopted by the U.S. Securities and Exchange Commission, paper copies of the Fund’s annual and semi-annual shareholder reports will no longer be sent by mail, unless you specifically request paper copies of the reports from the Fund or from your financial intermediary, such as a broker-dealer or bank. Instead, the reports will be made available on the Fund’s website (www.bairdassetmanagement.com/baird-funds/funds-and-performance#Literature), and you will be notified by mail each time a report is posted and provided with a website link to access the report.

If you already elected to receive shareholder reports electronically, you will not be affected by this change and you need not take any action. You may elect to receive shareholder reports and other communications from the Fund electronically anytime by contacting your financial intermediary or, if you are a direct investor, by calling 1-866-442-2473 or sending an e-mail request to info@bairdfunds.com.

You may elect to receive all future reports in paper free of charge. If you invest through a financial intermediary, you can contact your financial intermediary to request that you continue to receive paper copies of your shareholder reports. If you invest directly with the Fund, you can call 1-866-442-2473 or send an email request to info@bairdfunds.com to let the Fund know you wish to continue receiving paper copies of your shareholder reports. Your election to receive reports in paper will apply to all funds held in your account if you invest through your financial intermediary or all funds held with the fund complex if you invest directly with the Fund.
Investment Objective
The investment objective of the Fund is to provide long-term growth of capital.

Fees and Expenses of the Fund
The table below describes the fees and expenses that you may pay if you buy, hold and sell shares of the Fund. You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the tables and examples below.

Shareholder Fees
*(fees paid directly from your investment)*
None

Annual Fund Operating Expenses
*(expenses that you pay each year as a percentage of the value of your investment)*

<table>

Example
This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds.

The Example assumes that you invest $10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

<table>

</tr>
<tr>
<td>Institutional Class Shares</td>
<td>$84</td>
<td>$262</td>
<td>$455</td>
<td>$1,014</td>
</tr>
</tbody>
</table>

Portfolio Turnover
The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in total annual fund operating expenses or in the example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 43% of the average value of its portfolio.
Principal Investment Strategies

The Fund normally invests at least 80% of its net assets, plus any borrowings for investment purposes, in the equity securities of U.S. and foreign mid-capitalization companies, principally common stocks, preferred stocks, securities convertible into common stocks and American Depositary Receipts (“ADRs”) that are traded on major U.S. exchanges. Although the Fund principally invests in U.S. companies, the Fund may invest up to 15% of its total assets in equity securities (consisting of common stocks, ordinary shares and ADRs) of foreign companies. The Fund defines mid-capitalization companies as those companies with a market capitalization within the range of companies in the Russell Midcap® Growth Index at the time of investment.

When analyzing equity securities to be purchased by the Fund, Robert W. Baird & Co. Incorporated (the “Advisor”) emphasizes a company’s growth prospects. The Fund’s investments are selected using a variety of both quantitative techniques and fundamental research in seeking to maximize the Fund’s expected return while controlling risk.

The Fund seeks a portfolio comprised of companies which reflect “PRIME” growth factors. These factors are analyzed as part of the Advisor’s investment process and are represented in the following ways:

- **Durable Profitability.** Companies with attractive margins and favorable margin trends can drive superior earnings growth.

- **Sustainable Revenue Growth.** Solid barriers to entry, favorable pricing and demonstrated product/service track record can aid top-line prospects.

- **Favorable Industry dynamics.**

- **Management strength and integrity is a critical element of a high quality company.** Growth, profitability and shareholder returns provide insight into management effectiveness. The Advisor seeks companies with management that position their company’s balance sheet to be a source of strength.

- **Understanding market Expectations of a company is important in assessing risk/return opportunities.**

The Advisor believes an analysis of these PRIME factors yields insights to the competitive strength of a business model.

The Advisor applies the following strategies when purchasing securities for the Fund’s portfolio:

- Intentionally avoiding short-term trading strategies and rapid shifts in industry positions.

- Setting sector limits at the greater of 30% of the Fund’s total assets or double the weighting of the Russell Midcap® Growth Index in any one sector, as defined by such index.

- Typically holding the securities of fewer than 60 companies with exposure to at least 20 industries.

- Seeking securities whose growth prospects, in the Advisor’s opinion, are not reflected in their current stock prices.

- Limiting the size of any one new position. No security will represent more than 5% of the Fund’s total assets at the time of purchase.
• Leveraging key tools, such as the Advisor’s proprietary tier-board, which provides a visual representation of portfolio positions and enables discussion on relative weights of underlying positions.

The Advisor may sell a security due to achievement of valuation targets, significant change in the initial investment premise or fundamental deterioration.

Principal Risks
Please be aware that you may lose money by investing in the Fund. The following is a summary description of certain risks of investing in the Fund.

Stock Market Risks
Stock prices vary and may fall, thus reducing the value of the Fund’s investments. Certain stocks selected for the Fund’s portfolio may decline in value more than the overall stock market. The U.S. and international markets have recently experienced extreme price volatility and reduced liquidity. Continuing market problems may have adverse effects on the Fund.

Growth-Style Investing Risks
Because the Fund focuses on growth-style stocks, its performance may at times be better or worse than the performance of funds that focus on other types of stocks or that have a different investment style. Growth stocks are often characterized by high price-to-earnings ratios, which may be more volatile than stocks with lower price-to-earnings ratios.

Management Risks
The Advisor’s judgments about the attractiveness, value and potential appreciation of particular companies’ stocks may prove to be incorrect. Such errors could result in a negative return and a loss to you.

Equity Securities Risks
Equity securities may experience sudden, unpredictable drops in value or long periods of decline in value. This change may occur because of factors that affect securities markets generally or factors affecting specific industries, sectors or companies in which the Fund invests.

Common Stock Risks
Common stocks are susceptible to general stock market fluctuations and to volatile increases and decreases in value as market confidence in and perceptions of their issuers change. Holders of common stocks are generally subject to greater risk than holders of preferred stocks and debt obligations of the same issuer because common stockholders generally have inferior rights to receive payments from issuers in comparison with the rights of preferred stockholders, bondholders and other creditors.

Mid-Capitalization Risks
Mid-capitalization stocks are often more volatile and less liquid than investments in larger companies. The frequency and volume of trading in securities of mid-size companies may be substantially less than is typical of larger companies. Therefore, the securities of mid-size companies may be subject to greater and more abrupt price fluctuations. In addition, mid-size companies may lack the management experience, financial resources and product diversification of larger companies, making them more susceptible to market pressures and business failure.
Foreign Securities Risks

Securities of foreign issuers and ADRs are subject to certain inherent risks, such as political or economic instability of the country of issue and government policies, tax rates, withholding of foreign taxes, prevailing interest rates and credit conditions that may differ from those affecting domestic corporations. Securities of foreign issuers and ADRs may also be subject to currency fluctuations and controls and greater fluctuation in price than the securities of domestic corporations. Foreign companies generally are subject to different auditing and financial reporting standards than those applicable to domestic companies.

The United Kingdom withdrew from the European Union (EU) on January 31, 2020 following a June 2016 referendum referred to as “Brexit.” Upon the United Kingdom’s departure from the EU, the United Kingdom entered a transition period until December 31, 2020 during which time a trade deal and other key agreements are to be negotiated. Though the ramifications of Brexit will not be fully known for some time, the uncertainty surrounding the United Kingdom’s economy, and its legal, political, and economic relationship with the remaining member states of the EU, may cause considerable disruption in securities markets, including decreased liquidity and increased volatility, as well as currency fluctuations in the British pound’s exchange rate against the U.S. dollar.

Recent Market Events

U.S. and international markets have experienced significant periods of volatility in recent years due to a number of economic, political and global macro factors. Most recently, the novel coronavirus (COVID-19) has evolved into a global pandemic at a scale not seen since the Spanish Flu of 1918. The COVID-19 pandemic has required much of the developed world to restrict movement of people to slow the rate of infection and “flatten the curve” resulting in large segments of their economies being shut down. Essentially a global health crisis has created a global economic and financial crisis. Economies around the world, including the U.S., are expected to contract sharply in the near-term with unemployment rates reaching 15% to 25% over the next quarter. The impact and spread of COVID-19 in developing or emerging market countries may cause a relatively greater strain on those countries’ healthcare systems and economies than those in developed countries. The full effects, costs and duration of the coronavirus, as well as the effectiveness of government stimulus measures and other steps being taken to mitigate its impact, may not be known for some time and may continue to adversely affect the Fund. It is also possible the pandemic may exacerbate existing economic, political, or social tensions and may increase the probability of an economic recession or depression. These and other events could result in further market volatility and negatively affect financial asset prices, the liquidity of certain securities and the normal operations of securities exchanges and other markets. As a result, the risk environment remains elevated. The Advisor will monitor developments and seek to manage the Fund in a manner consistent with achieving the Fund’s investment objective, but there can be no assurance that it will be successful in doing so.

Performance

The performance information provides some indication of the risks of investing in the Fund by showing changes in the Fund’s performance from year to year and by showing how the Fund’s average annual returns for one, five and ten years and since inception compare with those of a broad measure of market performance. Past performance, before and after taxes, is not necessarily an indication of how the Fund will perform in the future. Updated performance information is available on the Fund’s website at www.bairdfunds.com or by calling the Fund toll-free at 1-866-442-2473.

(reflects no deduction for fees, expenses or taxes)

After-tax returns are shown only for Institutional Class shares, and the after-tax returns for Investor Class shares will vary. After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Your actual after-tax returns depend on your tax situation and may differ from those shown. After-tax returns are not relevant if you hold your shares through a tax-deferred account, such as a 401(k) plan or an individual retirement account.

Tax Information
The Fund’s distributions may be subject to federal income tax and may be taxed as ordinary income or long-term capital gains unless you are investing through a tax-deferred or other tax-advantaged arrangement, such as a 401(k) plan or an individual retirement account (“IRA”). You may be taxed later upon the withdrawal of such funds.

Payments to Broker-Dealers and Other Financial Intermediaries
If you purchase Fund shares through a broker-dealer or other financial intermediary (such as a bank), the Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. In addition, some broker-dealers may regard Institutional Class shares of the Fund as “clean” shares and charge you a commission on the purchase of such shares. Ask your salesperson or visit your financial intermediary’s website for more information.
